

Diagnostic Lab Reporting System

1. Table_Login

Field	Data Type	Description
Login_id	int(20)	Primary Key
Login_username	varchar(50)	Username
Login_password	varchar(50)	Password for login

2. Table_Registration

Field	Data type	Description
Registration_id	int(20)	Primary Key [Auto Increment]
Login_id	int(20)	Foreign key from Table_Login
Registration_name	varchar(50)	Name of user
Registration_address	varchar(50)	Address of user
Registration_phone	int(15)	Contact number
Registration_dob	date	Date of Birth of user
Registration_email	varchar(50)	Email Id of user
Registration_password	varchar(50)	Password

3. Table_Test

Field	Data type	Description
Test_id	int(20)	Primary Key [Auto Increment]
Test_name	varchar(30)	Name of test
Test_cost	float	Cost of test
Test_description	varchar(90)	Test description
Test_sampletype	char(20)	Sample type

4. Table_Report

Field	Data type	Description
Report_id	int(20)	Primary Key [Auto Increment]
Appointment_Info_id	int(20)	Foreign key from Table Appointment_Info
Report_on	varchar(50)	Test description
Report_Date	date	Date of the report

6. Table_Payment

Field	Data type	Description
Payment_id	int(10)	Primary Key
Registration_id	int(10)	Foreign key from Table_Registration
Appointment_id	int(10)	Foreign key from Table_Appointment
Payment_amount	float	Payment amount
Payment Status	char(30)	Status

5. Table_Appointment

Field	Data type	Description
Appointment_id	int(10)	Primary Key [Auto Increment]
Registration_id	int(20)	Foreign key from Table_Registration
Appointment_date	date	Booking date
Appointment_time	date	Booking time
Appointment_status	varchar(50)	Status

6. Appointment_Info

Field	Data type	Description
Appointment_Info_id	int(20)	Primary Key
Appointment_id	int(20)	Foreign key from Table_Appointment
Test_id	int(20)	Foreign key from Table_Test
